Newsletters Made Easy

Just add articles

JWAM have created a easy to use newsletter system that allows your school to simply add news articles to a newsletter edition and publish. As an optional extra you can even create email campaigns and send your school newsletter to your school community weekly, monthly or as often as you like. Newsletters include a List view where all articles can be seen and viewers can click to read. Reader view offers readers all of the news edition articles on a single page. Newsletters can also be printed and previous editions can be viewed.

Post Job Positions

Receive applications for jobs through your website

JWAM offer a employment module, making it easy to post jobs and receive applications. Employment positions are posted through the CMS and can be set to be hidden after the closing date. A form is available for applicants to complete and securely upload any supporting documents.
